

DIPAK B. KALSARIYA

Android Developer | AI/ML Integration | Kotlin & Java | MVVM | Clean Architecture

Surat, Gujarat, India | +91 98989 70987 | mrdipakkalsariya@gmail.com | [linkedin.com/in/dipak-kalsariya](https://www.linkedin.com/in/dipak-kalsariya)

PROFESSIONAL SUMMARY

Results-driven Android Developer with 3+ years of experience engineering enterprise and consumer mobile applications using Kotlin, Java, Android SDK, MVVM, and Clean Architecture. Proven track record delivering 7+ production applications featuring REST API integration, offline-first architecture, MDM solutions, Android TV, Microsoft Azure SSO/MFA, and on-device AI/ML capabilities. Adept at cross-functional collaboration with backend, QA, and UI/UX teams to ship scalable, high-performance applications on the Google Play Store.

CORE SKILLS

- **Languages:** Kotlin, Java
- **Android Development:** MVVM, Clean Architecture, Jetpack Compose, XML, Android SDK, Android TV
- **AI/ML Integration:** Google ML Kit, TensorFlow Lite, MediaPipe, Face Recognition & Detection, On-Device Chatbots
- **Enterprise / MDM:** Kiosk Mode, Geo-Fencing, Device Lockdown, Remote Configuration, Microsoft Azure SSO & MFA
- **Libraries & Tools:** Retrofit, Firebase, Room, SQLite, Work Manager, Git, GitHub, Android Studio, Figma, Postman
- **Backend & Deployment:** REST APIs, Ktor, Google Play Store, Production Deployment & Application Support

PROFESSIONAL EXPERIENCE

Software Engineer – Android | SSM Infotech Solutions Pvt. Ltd.

June 2023 – Present

- Engineered enterprise Android and MDM applications using Kotlin and Java, improving operational efficiency by 40% across client deployments.
- Architected kiosk mode, geo-fencing, remote configuration, and device restriction features, strengthening enterprise mobility and device security.
- Implemented Microsoft Azure SSO and multi-factor authentication (MFA), securing enterprise-wide user access for 500+ end users.
- Built Android TV applications with D-pad navigation, WebView dashboards, and dynamic URL configuration for kiosk-mode deployment.
- Optimized application performance and resolved critical defects, reducing crash rates by 30% and improving app store ratings.
- Designed offline-first architecture with background sync, cutting manual data dependency by 50% and improving field reliability.
- Partnered with clients, QA, and cross-functional teams on requirement gathering, production deployment, and post-launch support.

KEY PROJECTS

I View Progress – Enterprise Application | Tech: Kotlin, Java, SQLite, REST APIs, WebView

- Built a dynamic Android app with real-time notifications and offline support, boosting user engagement by 25%.

DOW – Digitalization of Workbook (MDM Solution) | Tech: Kotlin, Java, Work Manager, SOTI MobiControl

- Developed an offline-first digital workbook with kiosk mode and geo-fencing, reducing manual work by 50%.

Face Recognition System | Tech: Kotlin, Google ML Kit, TensorFlow Lite, CameraX

- Delivered real-time face detection and recognition using ML Kit and TFLite embedding models for secure authentication.

Offline AI Chatbot | Tech: Kotlin, MediaPipe, Room Database, SQLite

- Built an on-device LLM-powered chatbot with local chat history, enabling 100% offline AI conversations.

AIMS Connect – Organization App (Google Play Store) | Tech: Kotlin, REST APIs, WebView, Dependency Injection

- Published a production-ready MVVM app with secure authentication and background services to the Play Store.

EDUCATION

- **Certified Android Developer** — Red & White Multimedia Education (2021 – 2022)
- **Draughtsman Civil Engineering** — S.M.T B H Shah, Karjanvala (2018 – 2021)
